

NEWS RELEASE 19.12.2017

M1-classification was granted to upholstered office chairs for the first time.

The first M1-classification of upholstered office chairs was granted to Isku Interior Oy for the series Step+ and Still. The classification covers the Step+ and Still series with fabric surfaces (fabrics: Step, Step Melange, Runner, Fighter, Fame, Fame Hybrid and Crisp). Isku Interior Oy is a Finnish furniture company known for its high-quality standards and responsibility towards its customers. The M1-classification for upholstered office chairs has been possible since July 2017 and the interest to certify upholstered furniture has been increasing.

Since 2014 M1-classification system has also included furniture. At the moment there are 33 low-emitting furniture labelled with M1. Low-emitting furniture contribute to the good indoor air quality, choosing M1-labelled products the designers, the consumers and the retailers will have a proof that the product has been tested and certified.

Seminar about building material VOC emissions and regulations and labelling schemes in Europe

Building Information Foundations Product Manager Dr. Arja Valtanen will present the M1-labelling system in a seminar hosted by the Eurofins Product Testing A/S in Frankfurt, Germany. The seminar takes place on 29. (in German) and 30. (in English) of January 2018 in the Frankfurt Airport Conference Centre. More information:
